

CBD has been shown to reduce vomiting & nausea; suppress muscle spasms; and reduce seizures & convulsions.

It also has been shown to:

- promote relaxation and overall health,
- relieve anxiety,
- reduce nicotine cravings,
- aid in digestion; and
- inhibit cell growth in tumors and cancer cells.

These are small bottles of liquid high-potency, Pure Hemp Oil, sometimes called tinctures, that you take by dropping ½ dropper full of oil under your tongue once in the morning and once again in the evening.

There are 50 servings of Premium Hemp Oil per bottle.

The 4 different potencies are 300mg, 500mg, 750mg and 1500mg. You take the same amount regardless of which one you're using, it's just some are obviously more potent than others.

- The 300mg drops are for helping to reduce minor health problems and maintaining optimal health
- The 500mg drops are for helping to reduce more intense health problems and to re-establish good health
- The 750mg drops are for helping to deal with more severe health issues
- And the 1500mg drops are designed to help people who have really serious health challenges and need super strong results immediately.

All 4 potencies are naturally flavored with peppermint so they taste great! They are all made from Non-GMO, Pesticide Free, CO2 Extracted Hemp Oil using only organic ingredients.

And like all our products, they're manufactured in the USA in a registered GMP, cruelty-free facility.
